

THE E-SERIES

MORE SECURITY FOG OVER A LONGER PERIOD THAN ANY OTHER SYSTEM

✔ Fills large spaces in seconds ✔ Smallest, lightest, most powerful model ✔ Easy, seamless installation ✔ NO residue

DIGITAL INTERFACE

The E-Series is the most flexible range, offering control over all parameters. The generator can be tailored to exacting requirements.

RUGGED DESIGN

Constructed to defence standards, the E-Series is built to last, and protect.

PRECISION ENGINEERING

The safest, driest fog on the market is achieved with our precision engineered heater block. Covered by a LIFETIME warranty.

The EVOLUTION series of Concept Smoke Screen fog generators is exactly what the name suggests - Darwin's principles proven. This range of generators represents the pinnacle of our engineering excellence and experience. Every aspect of what a security fog generator is intended to do has been thought out, and the current range is the end result of 40 years of continuous application development. There is even a very good reason for the shape of the generators. The E-Series is exactly the right shape to be passed through a ceiling grid and mounted above a false ceiling. Our own installations have taught us that this is the optimal location for a security fog generator, both in terms of protecting the point of fog production, and in terms of the best way of introducing the fog itself - vertically down.

The range has advanced signalling capability, full fault awareness and the most flexible approach to installation options. The E-Series is in service, protecting property, with all manner of customers from home owners to large chains of retail stores.

THE TECH SPEC

FEATURES

- Competitive pricing
- Easy installation
- Simple integration into existing alarm systems
- Compact, rugged steel casing
- Guaranteed 'No Residue'
- Intelligent consumable monitoring
- Wall or ceiling mount
- British and European standard compliant
- £10 million product and public liability insurance
- Full range of models producing up to 1500m³ smoke per minute

OPERATION

- Inputs to accommodate 'Set', 'Trigger' and 'Hold-off'
- Simple smoke control

CONSTRUCTION

- Unique machined steel heater-block
- FIREROD® cartridge heaters

E-SERIES DATA

- 30(H) x 27(D) x 32(W) cm
- Weight 14 - 20 kg
- 230-volt, 2.8 kW
- 0.2 MMD particle
